

Ideation Phase

Define the Problem Statements

Date 02 October 2026

Team ID _____

Project Name Implement Client Script & UI Policy (Incident)

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am A ServiceNow user creating or updating an incident

I'm trying to Enter accurate incident information quickly

but I may enter incomplete or incorrect information in the incident form

because The form does not dynamically guide, validate, or control fields based on the incident details I enter

which makes me feel Confused and frustrated

Problem Statements:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow user creating or updating an incident	Enter accurate incident information quickly	I may enter incomplete or incorrect information in the incident form	The form does not dynamically guide, validate, or control fields based on the incident details I enter	Confused and frustrated
PS-2	A ServiceNow support agent handling incidents	Update and manage incident records efficiently	I have to manually check which fields are required, visible, or editable for different incident conditions	The incident form does not automatically adjust its field behaviour based on selected values or the current incident state	Frustrated and less productive
